CRYPTO YIELD FARMING

Great Opportunity In Crypto

STAKING

YIELD FARMING

LIQUIDITY MINING

**To Quickly Earn A Huge Profit
On Your Crypto Currency.**

What is Yield Farming

Yield farming is the process of using decentralized finance (DeFi) to maximize returns. Users lend or borrow crypto on a DeFi platform and earn cryptocurrency in return for their services.

Yield farmers who want to increase their yield output can employ more complex tactics. For example, yield farmers can constantly shift their cryptos between multiple loan platforms to optimize their gains.

Yield farming is the process of token holders maximizing rewards across various DeFi platforms.

Yield farmers provide liquidity to various token pairs and earn rewards in crypto currencies.

Types of yield farming:

- **Liquidity provider** : Users deposit two coins to a DEX to provide trading liquidity. Exchanges charge a small fee to swap the two tokens which is paid to liquidity providers. This fee can sometimes be paid in new liquidity pool (LP) tokens.
- **Lending** : Coin or token holders can lend crypto to borrowers through a smart contract and earn yield from interest paid on the loan.
- **Borrowing** : Farmers can use one token as collateral and receive a loan of another. Users can then farm yield with the borrowed coins. This way, the farmer keeps their initial holding, which may increase in value over time, while also earning yield on their borrowed coins.
- **Staking** : There are two forms of staking in the world of DeFi. The main form is on proof-of-stake blockchains, where a user is paid interest to pledge their tokens to the network to provide security. The second is to stake LP tokens earned from supplying a DEX with liquidity. This allows users to earn yield twice, as they are paid for supplying liquidity in LP tokens which they can then stake to earn more yield.

Yield Farming

When people say they are yield "farming," they just mean that they're giving something to a platform that justifies paying out an annualized percentage yield. Often, this effort entails adding liquidity to a network, and then staking liquidity provider tokens, or adding liquidity to a market for borrowing and lending. Projects incentives this behaviour when it enables them to function more efficiently. It has by and large the most effective system

In this farming yield. This is in part because nearly every token on natively yield-bearing, which enables its to function very efficiently. In this case, adding liquidity to any branch of the platform allows the platform as a whole to be more efficient, and every type of market is available. It is able to deliver a compounded yield farming experience by "stacking" these three yields in simple procedures

The Benefits of Yield Farming & Staking.

Yield farming Ethereum-based credit markets are new strategies for crypto owners to earn incredibly attractive returns on their cryptocurrency, at least a hundred times higher than a traditional bank would offer. Yield farming also offers higher profits than almost any other traditional investment

channel, from real estate to stocks and bonds. Yield farmers can also turbo-charge their returns with liquidity mining. They receive tokens from the company borrowing their funds, in addition to the high interest on their loan.

In this farming yield. This is in part because nearly every token on natively yield-bearing, which enables its to function very efficiently. In this case, adding liquidity to any branch of the platform allows the platform as a whole to be more efficient, and every type of market is available. It is able to deliver a compounded yield farming experience by "stacking" these three yields in simple procedures

Staking:

Staking locks up your assets to participate and help maintain the security of that network's blockchain. In exchange for locking up your assets and participating in the network validation, validators receive rewards in that cryptocurrency known as staking rewards.

Liquidity Pools In PancakeSwap

When you add your token to a Liquidity Pool you will receive Liquidity Provider (LP) tokens and share in the fees.

LP Tokens :-As an example, if you deposited CAKE and BNB into a Liquidity Pool, you'd receive CAKE-BNB LP tokens. The number of LP tokens you receive represents your portion of the CAKE-BNB Liquidity Pool.

Providing liquidity gives you a reward in the form of trading fees when people use your liquidity pool.

Whenever someone trades on PancakeSwap, the trader pays a 0.25% fee, of which 0.17% is added to the Liquidity Pool of the swap pair they traded on.

Crypto Mining ?

Bitcoin Mining Profitable...

Bitcoin mining is extremely profitable in 2022. Bitcoin miners are currently mining around \$20 million worth of Bitcoin per day. That's \$600 million per month. Bitcoin mining is the process by which miners earn bitcoins in exchange for running the verification process to validate bitcoin transactions.

Crypto mining, also involves validating cryptocurrency transactions on a blockchain network and adding them to a distributed ledger. Most importantly, crypto mining prevents the double-spending of digital currency on a distributed network.

Yield Farming In **Cyferhub**

Cyferhub great opportunity to earn
fast huge profit on Your efforts

Package of Yield Farming

To start earning, all you need to do is deposit one of the supported assets (In Tron TRC-20 network) into the Buyback contract. You can all assets deposit into Yield Farming and staking contract. The rewards are distributed automatically claimed every day.

STARTER

200 TRX

- Daily Profit 1%
- For 150 days
- Total profit 300 TRX

BASIC

500 TRX

- Daily Profit 1%
- For 200 days
- Total profit 1000 TRX

ECONOMY

2500 TRX

- Daily Profit 1%
- For 220 days
- Total profit 5500 TRX

DELUXE

10000 TRX

- Daily Profit 1%
- For 250 days
- Total profit 25000 TRX

PREMIUM PRO

50000 TRX

- Daily Profit 1%
- For 290 days
- Total profit 145000 TRX

ULTIMATE PRO

100000 TRX

- Daily Profit 1%
- For 350 days
- Total Profit 350000 TRX

Booster Income

You can boost your profit by referring the same package to two people in a week of joining date
and in the same package you will get the benefit of your package in half time:-

STARTER <hr/> 200 TRX <hr/> <ul style="list-style-type: none">• Daily Profit 2%• For 75 days• Total profit 300 TRX	BASIC <hr/> 500 TRX <hr/> <ul style="list-style-type: none">• Daily Profit 2%• For 100 days• Total profit 1000 TRX	ECONOMY <hr/> 2500 TRX <hr/> <ul style="list-style-type: none">• Daily Profit 2%• For 110 days• Total profit 5500 TRX

Staking CYF Token

The benefits of staking on CYF tokens are the 3% Monthly as a reward that get from staking your tokens. After depositing the asset (In Tron), you can staking in CYF Token at any time.

Team Referral Income

The Yield Farming Referral Program is our way of thanking and rewarding users for being an active member of the community and for sharing and promoting our products. If this sounds like something for you and you would like to earn a steady stream of benefits, join our referral program and receive the following benefits:

Level	Income
1	8%
2	5%
3	2%
4	1%
5	1%
6	1%
7	0.5%
8	0.5%
9	0.5%
10	0.5%

Team Yield Farming Income

For every person you refer to Cyferhub's Yield Farming, you'll also benefit from their and their team's farming profit, which will happen daily and by level 4 you'll earn up to 10%.

Level	Income %
1	4
2	3
3	2
4	1

Reward Bonus

in cyferhub's Referral program you will also get many rewards. You can enjoy cash prizes, domestic and international travel while helping each other in your team.

Leadership Bonus

You can get a “Leadership Bonus” based on your and your team's performance in CyferHub's referral program and up to 3% profit of all community, How to get the Leadership Bonus You can see the chart below

Leadership Bonus 1

1%

all community business

Rank: Bronze

Direct Referral: 10
Business : 25000 TRX

Leadership Bonus 2

2%

all community business

Rank: Pearl Star

Direct Referral: 10
Business : 25000 TRX

Leadership Bonus 3:

3%

all community business

Rank: Ruby Star

Direct Referral: 10
Business : 25000 TRX

Global Royalty

You can get "Global Royalty" based on your and your team's performance in CyferHub's referral program, Referring 1000 members and their business minimum 1000000 TRX at the third level will achieve you a "Royal Star" rank, on this rank you can achieve the Global Royalty 5% of all community business.

ROYAL STAR

5%

Royalty Bonus

The graphic features a large, 3D gold star with the text "ROYAL STAR" in bold black letters across its top points. Below the star, the text "5%" is displayed in large, bold, gold letters, and "Royalty Bonus" is written in bold black letters at the bottom. To the right of the text is an illustration of a man in a suit and sunglasses relaxing on a blue lounge chair. A small table next to him holds a laptop and a drink. A large pile of gold bars is on the floor, and a blue mechanical arm is dropping more gold bars into the pile.

Always remember things

- ◆ 200 trx to 100000 TRX package, buy multiple packages to earn yield Farming profit.
- ◆ 10% deduction on withdrawal, 5% staking CYF Token and 5% administration fee.
- ◆ After deposit assets, you can deposit yield farming a earn reward 30% Monthly, stake CYF Token and earn profit 3% Monthly
- ◆ The double quantity of package amount of CYF tokens will be credited to your wallet as soon as you purchase any package.
- ◆ You must have your own package of 2500 TRX to receive the Leadership Bonus 1, For Leadership Bonus 2, package of 10000 TRX, for Leadership Bonus 3, package of 50000 TRX and for Global Royalty, package of 100000 TRX.
